

Selected ETLF Bibliography

11-10-2025

1. Benson, 2017 **Characteristics of gas and leachate at an elevated temperature landfill**; Geotechnical Frontiers, 2017 (2017), pp. 313-322
2. De la Cruz, et al., 2021 **Evidence of thermophilic waste decomposition at a landfill exhibiting elevated temperature regions**; Waste Management, 124 (2021) 26-35
3. Huang, X.-L. and T. Tolaymat. **Gas quantity and composition from the hydrolysis of salt cake from secondary aluminum processing**. International Journal of Environmental Science and Technology, 16(4), 1955-1966. 2019
4. Krause, 2023 **Leachate indicators of an elevated temperature landfill**; Waste Management, (2023) 10.1016/j.wasman2023.10.001
5. Krause, 2023 **Understanding gas behavior from elevated temperature landfills**; Waste Manag. (2023), 10.1016/j.wasman.2023.04.023
6. Schupp, S., et al. **Evaluation of the temperature range for biological activity in landfills experiencing elevated temperatures**. ACS ES&T Engineering, 1(2). 2021.
7. Tupsakhare et al., 2020 **The impact of pressure, moisture and temperature on pyrolysis of municipal solid waste under simulated landfill conditions and relevance to the field data from elevated temperature landfill**; Sci. Total Environ., 723 (2020), Article 138031
8. Caldwell, M.D., Delfino, T., & Green, R. (2018). **Evaluating landfill liquids to predict elevated temperature conditions**. Global Waste Management Symposium. Indian Wells, CA.
9. Caldwell, M.D., Delfino, T., and Jafari, N.H., (2020), **Modelling Liquids Removal as an Elevated Temperature Mitigation or Prevention Option for MSW Landfills**, Global Waste Management Symposium, Feb. 2020, Indian Wells, CA.

10. Fathinezhad, A., Jafari, N.H., Oldenburg, C., and Caldwell, M.D., (2020) **Investigating Air Intrusion and Aerobic Reactions in Municipal Solid Waste Landfills**, American Geophysical Union Fall Conference, December 2020
11. Johnson, T., Khire, M., & Holt, R. (2018). **Heat generation and heat transfer in MSW landfills using geothermal modeling**. Global Waste Management Symposium. Indian Wells, CA.
12. Johnson, T., Khire, M. and Holt, R. (2020), **Field Data & Modeling of Heat Generation Rates in a Municipal Solid Waste Landfill Located in Northeastern United States**, Global Waste Management Symposium, Feb. 2020, Indian Wells, CA.
13. Khire, M. and Johnson, T. (2018), **Thermal Properties of Municipal Solid Waste from Landfills Located in Sub-humid and Humid Locations**, Global Waste Management Symposium, Feb. 2018, Indian Wells, CA.
14. Khire, M., Johnson, T., and Holt, W. (2020). **Geothermal Modeling of Elevated Temperature Landfills**, Proceedings of ASCE GeoCongress 2020 Modeling, Geomaterials, and Site Characterization, Minneapolis, MN, 417-424.
15. Khire, M., et.al., (2022), **Field Data and Modeling Heat Generation for MSW Landfill Containing Coal Combustion Residuals**, Global Waste Management Symposium, Feb. 2022, Indian Wells, CA
