

Wayne Sheldon

Even with our current regulations California's air quality is no better than the rest of the country. The current excessive regulation in California is creating misery. Further regulations will not fix this issue. Electric cars will not fix the co2 issue, electricity is mostly produced by natural gas. The proposed regulations will do nothing but further destroy the private sector and our living standards in California. Regulators are creating more pain for the poor. More people will move out of state. Please stop excessive government regulations, the private sector will fix the co2 issue with technology improvements over time, as they have done for decades. Government regulations will not fix and cannot fix these issues.

“The most fundamental fact about the ideas of the political left is that they do not work.

Therefore we should not be surprised to find the left concentrated in institutions where ideas do not have to work in order to survive.”

- Thomas Sowell
