

Jonathan Roberts

At what point does this end? You've already raised gas prices from Carb within the last 2 years. This has drastically hurt my family. \$1 more dollar raise might be insignificant to the board but to my family this is highly Punitive. Please stop. Ask the real question. At what point does Carb say enough \$\$\$ financial pain to drivers. Create more refineries. Incentive car companies. Please don't punish regular working people like myself and my family. Please stop hiking gas prices.
