California Air Resources Board
1001 I Street
Sacramento, CA 95814

RE: Protect Cap-and-Invest

Dear California Air Resources Board,

We are members of the California Environmental Voters Education Fund, and we are writing to urge you to deliver a stronger proposal that keeps California on track to meet the state's 2030 climate goals and protects our Cap-and-Invest program. Californians are facing the devastating impacts of an affordability crisis driven by climate change. It is unacceptable to create handouts for the oil and gas industry at the expense of our communities.

Cap-and-Invest is one of California's most effective tools for cutting pollution while keeping costs down for families. We cannot afford a proposal that undermines this program, especially as the worsening climate crisis drives up costs across the state.

If the California Air Resources Board (CARB) weakens the program to benefit the oil and gas industry, it would undermine climate progress and reduce annual program revenue by \$2 billion at a time when our state is cutting safety net services for Californians. This is especially concerning as the federal government continues to deprive California of critical disaster relief funding and slash programs that drive down costs. Revenue from Cap-and-Invest supports programs designed to benefit low-income and disadvantaged communities, groups most affected by climate change. Californians rely on these programs—and they can't afford to lose funding because of this proposal to benefit polluters.

We urge CARB to protect both our climate goals and affordability by rejecting any proposal that weakens the Cap-and-Invest program and instead adopting a stronger program that delivers real emissions reductions and supports Californians.

Thank you,

Neville Bruce
