

# Alvaro Ramos

Dear California Air Resources Board,

I live in California and I would like to provide comment on amendments to the program. We need to prepare California for the oil shock that is already affecting our energy system.

- (1) Make the "cap" lower to lower emissions, so that we can meet California's climate goals.
- (2) Reduce giveaways to the oil and gas industry. Eliminate the new "manufacturing decarbonization incentive."
- (3) Increase electricity bill credits.

Please vote for these proposed changes.
