

Steven Golden

You want to increase gas prices in the name of air quality as you poison our skies daily by spraying poisonous elements into the skies that rain down on us, the water we drink, the food we eat and the air we breathe. Never have been so disgusted with this state and its leadership

Large-Scale Atmospheric Distribution

Multiple aircraft traverse the sky simultaneously to spray the chemical mixture over residential areas.

The Five-Component Chemical Emission

Planes release a mix of aluminum, barium, strontium, lithium, and smart dust.

Aluminum

Strontium

Acute Physical Ailments

migraine

nausea

itchy eyes

chronic fatigue

Barium

Lithium

Lithium

Smart Dust

Widespread Psychological Distress

anxiety

depression

anger
