

Tanya Smith

Dear Members of CARB,

I urge you to "do the right things" by

- (1) Making the "cap" lower in order to lower emissions and meet California's climate goals;
- (2) Reducing giveaways to the oil and gas industry, especially by eliminating the new "manufacturing decarbonization incentive"; and
- (3) Increasing electricity bill credits.

Our planet deserves to be treated considerately and so do the residents of California.

Respectfully yours,
Tanya Smith
