

Casey Dunn

Good afternoon Madam Chair and members. My name is Casey Dunn speaking on behalf of Southern California Edison today in strong support of the Advanced Clean Fleets Regulation and Low Carbon Fuel Standard program. With ongoing federal uncertainty, SCE appreciates the Board's continued leadership in advancing the electric transition. These programs are critical to accelerating California's transition to a cleaner more sustainable transportation sector. These amendments strike a thoughtful balance between ambition and achievability, and we commend CARB staff for their extensive stakeholder engagement and technical rigor. We urge the Board to adopt these amendments and continue leading the nation in clean transportation policy. And congratulations, Madam Chair.
