

Michelle Anderson

Dear Board Members

I would love to see more push for Hybrid Semi trucks that only exhaust WATER!

Adding DEF is just putting ANOTHER chemical into the air no matter how you do it!

We are smarter than that and the technology is improving by leaps and bounds everyday!

Please REMOVE the DEF all together and help manufacturing make better hybrid motors!!

You could ACTUALLY do some good for the environment! California DESPERATELY needs more water! Why not every vehicle emitting it?? Seems like a win all the way around?

I know you guys can do better!

Also, you are NOT allowed to interfere with interstate commerce.

Any laws you approve against it will just get repealed and then you are wasting time and money and resources to put money in the lawyers pockets!

Thank you for all your hard work!

Have an amazing day!
