RE: Advanced Clean Fleets 15-Day Comment Period Response

Chair Lauren Sanchez and the Members of the California Air Resources Board:

We greatly appreciate the time and effort that has gone into the 15-day comment draft that has been published for public comment. While the goals of these regulations are laudable, the reality remains that we cannot safely serve our communities unless emergency support vehicles are exempted.

At Rincon del Diablo Municipal Water District, we serve a community spanning 42 square miles. Our community relies on us for water, wastewater, and fire protection services. During emergencies, our vehicles must travel to provide essential services, including operation and repair of water and wastewater infrastructure, which may require our vehicles to operate continuously for multiple days in challenging conditions that may not allow access to electric vehicle charging infrastructure.

To prevent unnecessary loss of life and property in the communities we serve, please reconsider the amendments respectfully requested in the October 7th letter submitted by the California Special Districts Association, League of California Cities, and California State Association of Counties, collectively representing our state's 5,000 local agencies and 40 million residents.

Local agencies like ours continue to do our part in achieving the State's climate and emissions goals. Our proposed amendments will enable us to better meet this challenge and effectively navigate the current Advanced Clean Fleets (ACF) mandates and their associated ambitious compliance deadlines. Of critical concern to our community, the ACF mandates on local agencies are creating unnecessary challenges in complying while maintaining the many critical services Californians rely upon for their most essential daily needs as well as during emergencies and disasters.

Vehicles that that need to be categorically exempted from the regulations the same manner as those found in part (c) of § 2013 of title 13 of the California code of regulations to include those vehicles that respond to, assist in and recover from disasters and emergencies to include: water utility vehicles, flood protection vehicles, sewer utility vehicles, electric utility vehicles, fire prevention vehicles, fire protection vehicles, search and rescue vehicles, and disease and vector control vehicles.

We respectfully request that you amend the ACF exemptions to allow our vehicles that support emergency services to continue serving our communities when we need them most.

Thank you for your consideration,

Jeff Umbrasas  
General Manager
