Subject: Comments on Second 15-Day Changes to the Advanced Clean Fleets Regulation

Zone 7 Water Agency (Zone 7) appreciates the opportunity to provide feedback to the California Air Resources Board ("CARB") staff on the proposed amendments ("Second 15-Day Changes") to the Advanced Clean Fleets ("ACF") rule, posted June 1, 2026. Upon review of the Second 15-Day Changes, Zone 7 has concerns regarding the interpretation of the changes, compliance challenges, impacts to ratepayers, and the effect on Zone 7's ability to contract for needed services to maintain essential public services.

Zone 7 requests that the Second 15-Day Changes to the Advanced Clean Fleets Regulation be withdrawn or modified consistent with comments provided by other governmental organizations, including the Association of California Water Agencies, California Municipal Utilities Association, and California Special Districts Association.

Zone 7 appreciates the work that CARB is undertaking and is committed to continued collaboration and compliance with the ACF rule.

Sincerely,

Valerie L. Pryor
