

L11 D

As a CALIFORNIAN and longtime environmentally concerned individual....

I have concerns with changes to "clean fleets and low carbon standards " being altered and or erased by any attempts from the Trump administration/Republican party to deregulate fuel standards/air quality standards and or the elimination of "clean fleets" for the usage of gasoline heavy vehicles!!!!

Climate change is REAL!

Keep our clean fleets!

Keep our low carbon fuel standards!

Regulate, regulate, regulate!

Thank you for your consideration

Sincerely, Californian LD
