

Test asdfasdf

Do you live in Placer County?

Yes

What outdoor activities do you enjoy?

Biking

Swimming

How happy are you with the current master plan?

Very Unhappy

Do you have any general comments?

The environmental impact would be not only noise pollution, but animals that are native to this region which are in short if not extinct supply would be most negatively impacted. We have roadrunners which are not very common anymore. I saw one of the largest ones I've ever seen in my cabin's driveway recently.

You must make sure that cities and counties are required to undertake meaningful, inclusive public engagement as they make decisions that will directly impact our communities.

We have a settler's historic cemetery in Smithville which is maintained by my husband and several others of the Smithville Community Church board. We still have our family reunion and talk about old times in Smithville in October of each year. Please don't affect this historical site.

I'm not against progress, but I do feel with the cost of ridership that this project is not only undesirable economically, physically, and financially, it will not succeed. I don't want my farm to be used for raw materials and not ever have a chance to buy it back. This sham if there isn't enough money because it is priceless to me and my whole family.
