

## Tom Nadal

I would like to lend strong support for including Vancouver Lake among prioritized bodies of water to be cleaned and saved. The lake is a vital recreation area for both the city of Vancouver and Clark County. The activities it supports are many and diverse and include boating of all kinds, a public park and swimming area , and bird hunting with a special area for handicap access. It is home to a sailing club, a dragon boat team and several rowing clubs The lake ism relatively shallow with little water turnover and subject to algae blooms ,e- coli contamination and invasive species.
