

Oscar Johnson

As General Manager of Advantage Dirt Contractors Inc, we agree, this will help with reducing emissions into the environment, add more space for other possible utilities.

I feel this is a responsible move by Vantage as it shows their constant push for a greener solution in the choice to reduce their overall carbon foot print in voluntarily reducing the size of gens. This seems like a no brainer. Why would anyone in there right mind dispute this? I'm 100% behind this plan.
