Please prioritize Vancouver Lake in the next round of projects to address and fix the lake's issues. There are constantly warnings issued about the risk to public health due to the severity of the pollution problem in Vancouver Lake. However, because of lack of funding, the message does not always get out and people are at risk. The community of Vancouver treasures it's namesake lake and enjoys swimming, non motorized boating, etc.. My family has participated in several triathlons and other event but we always worry about the quality of the water and if someone will get sick. Please help provide funding to solve Vancouver Lake's issues.

Thank you!
