

Stephen Wu

Please consider Vancouver Lake for your priority to clean up. It is home every year to both the NW juniors regional rowing regatta and Masters NW regional regatta. It is ideal due to its central location for rowers coming up from California and southern Oregon and all the way up north from Canada and the Seattle area. The combined numbers from both juniors and masters including rowers, families and spectators is in the thousands over two sets of three days. It works be a huge set back if the lake was not clean. This year there was a threat of blue green algae bloom which could have threatened whether to hold the regatta or cancel. Please consider this as your top priority. Thank you
