

Betty Jackson

The environmental impact would affect animals that are native to this region which are in short if not extinct supply. We have roadrunners which are not very common anymore. I saw one of the largest ones I've ever seen in my cabin's driveway recently. You must make sure that cities and counties are required to undertake meaningful, inclusive public engagement as they make decisions that will directly impact our communities.

We have a settler's historic cemetery in Smithville which is maintained by my husband and several others of the Bensonville Community Church board. We still have our family reunion and talk about old times in Bensonville in October of each year. Please don't affect this historical site.
