

John Manix

I frequently use the lake for sailing a very small boat (Laser). Thus, I come in contact with the water and at risk of health problems by not addressing water quality. This includes my son who also sails and fellow Laser sailors who I race against.

Beyond my family, friends and self, I see a lot of fishing by local residents. Go by the flushing channel and you will see several individuals and families fishing most weekends.

At Vancouver Lake Park provides swimming opportunity for low income residents on the west side of Vancouver.

I wonder how the water quality effects the Bald Eagles that frequent the lake in the spring.

I think it would be a shame to let the lake devolve into a polluted waste water by inaction. I know it is a challenging task but worth the effort.
