

Individual (Roxanne Davis)

To whom it may concern:RE: Comment on Proposed Rule: Paper PotsI am in support of Allowing paper pots for use as a planting aid in organic crop production.The proposed rule will benefit myself and many other organic farms. The time savings and planting accuracy of this tool is of great benefit. It allows me to grow more food and not go broke doing it. I can transplant more, which helps me get a head start on weeds. Labor is a large expense for me.Sincerely, Roxanne Davis / Onda Farm, LLC
