

Gail Weinberger

I am an artisan cook who has a food business where I grow many of my ingredients for my products. I am not certified organic at this time but I follow organic/biodynamic practices in my regenerative farming. Last year was the first time that I used paper pots and they were amazing!!! Easy to make starts of almost all that I grow. I am hoping that you will allow certified organic growers to use these to grow their veggies. It makes life much simpler and the waste, in my opinion, is much less. There is too much plastic being used. That needs to end! Please consider this as an important step to a cleaner environment. Thank-you for taking the time to read this. Warmly, Gail
