

Cynthia Fuller

As someone who grows her vegetables organically, buys organically at every opportunity, and is a URI Master Gardener training people on organic methods of growing crops, I have been discouraged by the chipping away at organic standards to cater to industrial food producers. All labeling should be absolutely upfront and ALL ingredients in a product need to be categorized. Don't be slipping in or approving GMOs or other non-organic ingredients. STAND AGAINST REPUGNICAN EFFORTS TO DESTROY THE NOP!!!!
