

Paul Huber

Hello,I would like to voice my support for allowing paper pots in organic production. We have used them on our farm for the last 5 years and have been nothing but pleased with the increase in our productivity and health of our plants. The paper breaks down quickly, adding carbon back into our soil. We have no reservations about the contents of the material. Please ensure paper pots are allowed in organic production to help with the farmer's bottom line while protecting the environment.
